Reason Seen:

Rmkin

Subjective

"Terrible - I'm still hearing voices of seeing demons & angels. The medication is not working."

Objective

patient reports hearing voices & seeing things since age 8. voices is of deadman, demons, etc & see angels & demons - experiences more of religious - nature. Thinks that Satan is trying to kill him - All meds not worked for him.

Assessment

Currently on perphenazine. Omports Haldol.

A - Very psychotic

Plan

Start Haldol

<p>11/7/00 Pt. seen briefly on a walk-in basis per his request. Pt. was alert and oriented X4. He was neatly dressed and meticulously groomed. He expressed indefatigable determination to overcome mental health concerns but was vague and in his presentation of them. Pt. was not imminently suicidal at the time of the interview and no S/H ideation was present. Although the pt. refrained from providing voluminous detail, he was doggedly adamant about scheduling another appointment. Pt. was scheduled for the next available appointment. During the course of that session antecedent circumstances leading to the pt.'s sedulous importuning will be explored and a more comprehensive assessment will be administered.</p> <p style="text-align: right;">B. 1/11/00 Pt. seen for psychiatric follow-up. He was timorous in manner and displayed a vexaciously skittish ~~in~~ interactional style. His sense of ongoing consternation and insufferable malaise was prominently noticeable. He reported vagrantly mercurial mood patterns and appreciable hardship in terms of adapting to the austere harsh conditions of prison life. Efforts were aimed at ameliorating the pt's anxiety by inculcating a higher level of self-esteem and introducing a variety of coping techniques.

BC Thiessen, PhD

2/11/00		<p>Pt. seen for 1/ follow-up. Pt. oriented x4 but displayed mildly heightened psychomotoric functioning. He was aptly groomed/dressed and affably conversant. However However, fund of information was narrowly construed, revealing innumerable interstices and intellectual and emotional functioning was m/b of subject inconcinnity. Medication seems to be having an ameliorative effect in terms of reducing the stentorian nature of auditory hallucinations and decreasing the pt's experience of ostensibly ubiquitous forces insidiously plotting against him. Efforts were made to foster the reintegration of hitherto dissociated elements of the pt's ego, presently projected onto the pt's archetypal complex. This was done by operating as an auxiliary ego and thus, containing the fragmented elements of the pt's sense of self.</p>

EVALUATION AND TREATMENT PLAN (MH)

Date 4/25/01

Laboratory Studies

Lithium	Date	Tegretol	Date	Valproate	Date	Dilantin	Date	CBC	Date	SMA-20	Date	Liver Pan	Date

Lab Comments:

Clinical Summary and Current Behavior Risk Assessment:

Suicide	Low	Self Injury	Low	Unpredictable	Low
Aggression	Low	Sexual	Low		

Behavior Comments:

I/M reports hx of 2 suicide attempts--1974 drank Brasso; 1988 cut wrist.
I/M denies any current suicidal ideation or intent.

Subjective Complaints:

I/M admits to v/h but states that he refers to these as visions. States has had these since age 8. I/M gives these v/h religious interpretations, eg has seen fire in his room, room fill up w/ mist, ceiling turning red w/ red eye in the middle. Currently, sees devils, "a room full, but I am blessed not to be attacked." States this is common & he is use to it. Also has a/h of mother calling him. Chart indicates a/h involving talking w/ God.

Objective Findings:

New to wing. Cooperative in IDTT.

Current Assessment:

Delusional, grandiose w/ v/h and a/h. Seemingly bright affect but recent s/i w/out intent suggests depression. Hx of staying up for days, suggestive of hx of manic and depressive symptoms. I/M reports he never has period of time w/out "visions", suggesting that Schizoaffective Disorder Dx may be more appropriate than Bipolar Disorder.

Current Plan and Treatment Recommendations:

Retain at EOP level of care. Monitor and observe for symptoms. Implement Tx Plan.

Level of Care: EOP

EVALUATION AND TREATMENT PLAN (MH 2)

Date

10/17/01

Current Working Diagnosis:

Axis I

295.70 Schizoaffective Disorder
304.80 Polysubstance Dependence, Institutional Remission

Axis II

301.9 Personality Disorder NOS with narcissistic and antisocial features

Axis III

Hepatitis, seizures, chronic pain

Axis IV

Incarceratio

Axis V

45 Calculated GAF

Impair	Skill		

Keyhea Expires

AIMS	Date
0	4/25/01

Diagnostic Comments:

IM has perceptual disturbances dating back to childhood, and at least 2 admitted depressions with suicide attempts. Has primary sx of v/h, ("visions"). Is delusional and grandiose, "sometimes I think I'm Jesus Christ". Has had episodes of requiring no sleep for days. Therefore gave Dx of Schizoaffective Disorder. I/M has strong narcissism. He also has long hx of crimes, suggesting antisocial features, though some of these crimes appeared to be influenced by mental illness.

Treatment Plan:

Treatment Objectives

Psychiatric History

This inmate reports history of visual and auditory hallucinations since approximately age 8. Visual hallucinations are of demons and angels, although he recalls at age 8 seeing a woman and a monkey under a bed. He has heard God talking to him and occasionally hears his mother calling his name. He reports first treatment for psychiatric symptoms in 1997 when he was arrested for running naked in the neighborhood. He believes that God wanted him to do this, that it was in response to demons. He denies psychiatric hospitalizations, and review of records indicates none as well. He reports two episodes of depression and suicide attempts, both after losing a girlfriend, one by cutting his wrist in 1988 and one by drinking Brasso in 1974.

Abnormal Behavior History (Suicide, Self Mutilation, Violence, Sexual, etc.)

Risk Assessment	Suicide	Aggressive	Self Injury	Sexual	Unpredictable
	Low	Low	Low	Low	Low

IM reports history of 2 suicide attempts--1974 drank Brasso, 1988 cut wrist.
IM denies any suicidal ideation or intent, however he states, "I want it all to end right now, but it's against my beliefs."
IM states that he cannot have a cellmate as he would not be able to tolerate it.

Criminal History and Institutional Adjustment: Juvenile History ☐ Gang Affiliation ☐ Specify ☐

IM is serving a 25-life term for third strike of stealing a car. He has extensive adolescent juvenile history with time in Juvenile Detention.

IM reports that he had an RVR, for which he was found not guilty, in December for touching a female custody staff inappropriately.

He has had a number of counseling chronos for minor rule violations.

Developmental and Social History

Youngest of 7, (3 sisters, 3 brothers), raised by mother and stepfather. Born and raised in San Francisco. Mother deceased 1994 of CHF, father deceased 1974 of cancer. Had a reportedly close relationship with stepfather who died in 1995. States isolation from other siblings. Reports significant sexual abuse by male neighbor from ages 6-8. Brother suicided by hanging at age 35 and thought he was Jesus Christ. Employment sporadic and short-term, mostly unskilled labor. Marines 1972 with dishonorable d/c for buying stolen TVs. Practicing Muslim; very religious.

Objective

Assessment

Plan

1/11 reports continued w/ h & v/h though he does not describe them in those terms & is sure they are spiritually based experiences. He reports some depression. He also is report that he is going on a spiritual fast for 4 days, starting next week, this will include not taking med.

1/11 has been extremely active in groups, seeing this as basis for why God might have wanted him in EOP + CMF/prison - to help others. 1/11 has been med compliant but

Thoughts are organized & clear - no clear delusional content at this time. Is religiously preoccupied.

Continue @ EOP level of care as present program

Reason Seen: Routine Evaluation**Subjective**

I'm back to taking my medication. Reports that he is going to fast for religious reason, including holding off medications.

Objective

Alert, clear, coherent, still admits to 'seeing demons and angels', reports voices but are manageable, denies suicidal/homicidal ideations/impulsess when asked, states he is over his fasting including medication, appears stable, otherwise he reports compliance with medication at other times.

Assessment

Appear stable with residual symptoms.

Plan

Renew psych medications, continue present program, advice to alert staff if he plans to hold medications for religious reasons.
